SOLUTION REQUIREMENTS

Every self builder has their individual expectations and ambitions in terms of the final result of their Self Build project. The process of designing a home is very demanding and challenging, as it is a crucial stage that is responsible for making your vision a reality.

This is our series called 'Home design: A step-by-step guide to designing your dream home'. It is based on a talk created and delivered by Allan Corfield for Homebuilding & Renovating Magazine, at the 2018 shows. The series will take you through the three main stages in developing an empty plot into a well-organised construction site equipped with experts who can successfully build your dream home.
