TECHNOLOGY STACK

Back-End/Server Side

The back-end involves the part where developers can perform certain actions from the back of the website, not visible to the users. The back end, also known as the server side consists of a server, an application (OS, Web server, Programming language, Web framework), and a database.

In Trend Back-End Technologies 2019 & beyond:

Choosing the back-end technologies is the biggest challenge entrepreneurs or companies face. Here are the most popular back end languages of the year.

Every self builder has their individual expectations and ambitions in terms of the final result of their Self Build project. The process of designing a home is very demanding and challenging, as it is a crucial stage that is responsible for making your vision a reality.
